Dec. 2012- May 2015

IGM Department  
Sept. 2013- May 2015

## OBJECTIVE

To bring my skills as a front end web developer to a fast paced team of developers and designers to create unique user experiences across the various devices that access the web.

## EXPERIENCE

### Gupta Media

Front End Software Engineer

June 2015 - Present

- Created and maintain a custom framework for company reporting suite
- Build features pulling data from AdWords, Facebook, and Twitter APIs
- Develop custom themes for music festivals and other events
- Interacted directly with clients to identify and diagnose specific needs
- Collaborated with design team creating dynamic advertisements

### RIT MAGIC Center

Lead Web Developer

January - May 2014

- Designed and developed complementary site to Chain Gang Chase game
- Established API for in-game downloads and statistic tracking
- Features include forums, developer blog, map editor, and admin panel

### Magnani Caruso Dutton Inc.

Development Intern

June - August 2013

- Built custom theme for redesign of company website
- Worked with QA team on browser and device testing
- Prototyped UI features for client projects

### NYCM Insurance

Development Intern

June - August 2012

- Designed and developed corporate intranet
- Featured ride sharing, classifieds, corporate updates, interactive widgets
